

MAKING AEROPLANE JELLY

Total: 5min
Preparation: 5min

1 portion(s)

Ingredients

Making aeroplane jelly (1 packet)

1 packages jelly powder
Aeroplane jelly
250 g water boil or pre-boil
200 g cold water To add as is

Preparation

To make jelly

- * Add 1 cup water to bowl
- * Set **"Kettle"** to 100° **"Warm Up"** (you can skip this step by adding boiled water from kettle).
- * Cut top of jelly right off (you want to pour as quick as possible as packet will get damp and hard to pour out otherwise).
- * Set details before you pour powder in. **"Slow Cooking"** 2mins **"Warm Up"** 100°, **"Gentle stir setting"** 2.5 (I haven't tried any shorter time yet).
- * Pour powder in area in between blades and the wider area so helps stir all granules up.
- * Add cold water
- * **"Gentle stir setting"** 2.5 **"Slow Cooking"** 20secs
- * Pour into container you want jelly to set.
